

STIMILoN
2026 SPRING / SUMMER

‘ S as in STIMILoN ’

For the 2026 S/S season, STIMILoN captures the warm light and air of spring and summer, along with the delicate sensations that arise within, reinterpreting various S's — Silhouette, Sensibility, Subtlety — through its unique perspective.

Clear and transparent colors, fluid silhouettes, and details that convey movement come together to evoke a dreamlike atmosphere that feels both familiar and subtly unfamiliar, presenting looks where neatness and the softness of warm days naturally blend.

Cut-outs, strap details, and textured fabrics add rhythm to clean silhouettes, while layering and structural elements gently emphasize the brand's signature style. Minimal tones such as white, beige, blue, and black create a calm yet vivid impression, with textures and - shapes reflecting light differently at every angle, producing a fresh mood vwith each moment.

This season, STIMILoN paints silhouettes that are light and free like the breeze in the midday sun, offering moments of subtle sparkle that quietly emerge within everyday life. STIMILoN invites you to embrace this fleeting beauty.
