

**STIMILoN**

**2026 FALL / WINTER**

**“POISED”**

For the 2026 Fall/Winter season, STIMILoN presents its design language in a restrained and refined way, capturing depth and emotion within a minimal, composed aesthetic. Clean silhouettes are defined by asymmetric paneling, fluid draping, and subtle structural details, creating a quiet tension beneath the surface. Rather than relying on overt decoration, the collection reveals its character through nuanced shifts in form, balance, and negative space. With a more feminine undertone than previous seasons, 26FW expresses the layered depth of autumn and winter through silhouettes that are both soft and controlled, reflecting a poised elegance and the evolving maturity of STIMILoN's identity.
